Autodesk Exchange Apps are also available for Windows and Mac OS. In addition, AutoCAD and AutoCAD LT also support a server-based XML-based messaging technology called DWG Connect. History AutoCAD was originally based on the Draw programming language, which was later replaced with AutoLISP. Draw was based on the notation and statement used in LISP programming. Draw statements, which are called keywords, are similar to that of other LISP languages, and include LOAD, ECHO, DECLARE, EQUAL, START, and so on. The syntax of the LISP dialect used in AutoCAD is based on the Common LISP specification. Fracture of the mandibular condyle: a comparison of the prognosis in patients with and without previous cervical spine surgery. The aim of this study was to analyze the prognosis in patients with mandibular condyle fracture following previous cervical spine surgery. Fifty-three patients (15 men, 38 women) were included. The mean age was 49 years. Forty-one patients had undergone cervical spine surgery. The average follow-up was 14 months (range: 1-60 months). The patients were examined using the 'Copenhagen outcome scale (COPSOQ)' and the 'Social security disability pension (SS-DP)'. An analysis was made of the physical and psychological outcome. The findings were compared with published results for patients with mandibular condyle fractures without previous cervical spine surgery. Statistical analysis was performed using the Mann-Whitney U test. The mean age of the patients was 52 years. Six (11%) of the patients had improved, 13 (24%) had improved or remained unchanged, and 36 (68%) had deteriorated. The degree of dependency on social security disability pension was significantly lower than in patients who had not undergone previous cervical spine surgery (p Field of the Invention The present invention generally relates to gasification systems, and, more particularly, to methods and systems for cleaning a gasifier.
