What's New in the?

Update 2: Announcements: Next C4D release will be available on May 16. Please review the release notes before upgrading. Markup Import and Markup Assist: Rapidly send and incorporate feedback into your designs. Import feedback from printed paper or PDFs and add changes to your drawings automatically, without additional drawing steps. (video: 1:15 min.) Update 2: Announcements: Next C4D release will be available on May 16. Please review the release notes before upgrading. The AutoCAD® 2018.2 New Features page contains a complete list of new features and updates in AutoCAD 2018.2. These features are arranged into the following sections: New in Drawing and Modeling New in Dimensioning New in Precision, Engineering, and Product Design New in View and Navigation New in the Editor New in Utilities and Scripting New in SharePoint, OneDrive, and SCVMM New in the Licensing Manager New in the Release Notes New in the Roadmap and Milestones New in the Release History New in the forums New in the documentation New in the video training gallery New in the Online Training section New in the Previous versions section New in the Downloadable content section New in the AutoCAD Community To keep current with AutoCAD news, check the AutoCAD Blog. Note: All new features and updates are also present on the official Microsoft site: Autodesk AutoCAD 2018.2. New in Drawing and Modeling Drawing and Modeling The Dimension toolset 3D modeling has never been easier. AutoCAD® 2019 release of the Dimension toolset in drawing and modeling offers robust tracking and intelligent feature placement for 3D models and surfaces. There are four major enhancements to dimensioning: Support for 3D models. Enhanced tiling, which lets you automatically tessellate 3D surfaces. Access to 3D surface editing and intelligent feature placement using the new dimension tool. Support for text styles, which lets you apply a consistent format to dimension text in 3D models and surfaces. In addition, the new dimension tool in 3D has a number of
