not get into spoilers so just know that there
will be some. It is known that some
nutrients are found in human milk to the
extent that they are passed on to the baby
in his/her first months of life and/or during
the first years of life. The protein fractions
of milk comprise the caseins, which are the
only biological constituents of milk, which
give milk its specific properties, such as
emulsification, foam formation and the
viscosity. The casein is made up of
molecules having a molecular weight of
about 100,000 Da to 1,800,000 Da. A
human milk composition with a content of
protein corresponding to the
macromolecular fraction of the whey
consists of about 50% casein and about
50% whey; therefore, to obtain a new
product rich in casein, it is necessary to

separate this fraction from the whey, which is a complicated operation, the cost of which is relatively high

The Thanatogene Project is pleased to announce that artist candidate Giovanni Caproni is selected as the winner of the 2011 Thanatogene Challenge, which was developed by Jack O'Malley and Jay Robison, with assistance from artist Rebecca Zayas. Giovanni's original submission, a real time sketch of a ghoulish character, was chosen for the final installation of our first Thanatogene book, which opens in 2014. Giovanni is also being awarded the opportunity to design a Thanatogene book cover based on his Thanatogene-inspired illustration. In addition, he'll win the opportunity to create an original Thanatogene video, which will be shown throughout 2014 at showcases and events around the world. The Thanatogene Project will also donate a portion of Giovanni's book cover
