Check out our best Chromebooks for under \$250. RELATED: The best \$1000 laptops you can buy right now \$1000 Laptop: Asus ZenBook Flip 14 Check out our review here. The Build Thick enough to be portable and slim enough to tuck under your arm, the ZenBook Flip 14 is made of glossy magnesium-alloy with a metal lid. This budget laptop delivers bright colors and sharp visuals. It runs on

---

the latest 8th-generation Intel Core processors, supports dual-band Gigabit Wi-Fi, and has a lot of storage (256GB).

The ZenBook Flip 14 is slim and light enough to take with you wherever you go. However, there are a few downsides. The

13.3-inch display has 1536x900 resolution and the keyboard feels cramped. The touchscreen won't work in Windows 10 S mode. Software Windows 10 S mode: Windows 10 S is a stripped-down, locked-down version of Windows that restricts what apps can be installed and performed on the device. The Google Pixel 3's Pixel Visual Core uses custom software and hardware to perform machine learning, so it can make some very clever suggestions and adjust the

---

display in ways that wouldn't normally be possible. The custom software can't be used by developers, so Google Pixel phones, third-party developer laptops, and developers using the Windows Store haven't been able to fully take advantage of the Pixel Visual Core without jailbreaking. Google has since allowed developers to use their own software to perform machine learning on top of the Pixel Visual Core, so Windows 10 S should be completely open to developers by the time this review is published. There are also some annoying limitations. Most apps don't run full-screen. In fact, only apps with the Windows Store Modern Design certification will run full-screen. Some apps like Chrome will run

---

in full-screen, but others like Kodi will

Mesothelin (MSLN) is a cell surface glycoprotein and tumor antigen ([@bib1]; [@bib3]; [@bib7]; [@bib13]). It is highly expressed in mesotheliomas, and is widely used as a marker for mesothelioma ([@bib4]; [@bib5]; [@bib11]; [@bib15]; [@bib21]; [@bib22]; [@bib24]). In recent studies, we identified two novel mesothelin variants, including a non-glycosylated  $msln^{K24E/F31E}$  mutant, with a potential maturation defect that is likely to be associated with malignant phenotype ([@bib8]; [@bib16]; [@bib20]). The functional significance of  $msln$  variants is unknown, but this fact is

---

certainly a matter of concern for future investigations. Various procedures have been used for the characterization of novel msln variants. In one approach, the entire genomic sequence encoding amino acid 24--38 of msln ([Figure 1A](#fig1){ref-type="fig"}) was inserted upstream of the immunoglobulin signal peptide (SP) in the light chain ( $\lambda$ -Ig $\lambda$ , mIg $\lambda$ ) and heavy chain ( $\kappa$ -Ig $\kappa$ ) by overlap extension ([@bib9]; [@bib14]). This strategy resulted in different point mutations in msln; a missense mutation at amino acid 31 (G31R or G to R), and nonsense mutations at amino acid 38 (T38\* or T to \*) ([@bib8]; [@bib16]). In another approach, only the 1st extracellular loop (ECL1) was inserted

---

downstream of the SP of mIgλκ; this led to a G31D mutation, a non-sense mutation at the second extracellular loop (ECL2; T38A\*), and a mutation at the transmembrane domain (residues 24--38) (T24I, T25V, I31K, V32M, or S33C) ([@bib20]). In this study, we compared the function of novel msln variants in immunization with the aforementioned mIgλκ, and two other fusion proteins with different maturation and secretion mechanisms; secretory Ig

What's New in the How To Download Photoshop For Free Windows 8.1?

Q: Update number for docker-compose I have the following docker-compose:  
version: '3.3' services: mysql: image:

---

mysql:5.6 restart: always environment:

MYSQL\_ROOT\_PASSWORD: xxxx

MYSQL\_DATABASE: myDatabase

MYSQL\_USER: myDatabaseUsername

MYSQL\_PASSWORD:

myDatabasePassword volumes: -

~/mysql:/var/lib/mysql How can i change

the number in the restart: always in order

to have the mysql service restart each 3

hours? A: You can't do that in one go.

You'll have to re-design your Dockerfile

to achieve this. That's because services

like mysql restarts one when the memory

used has gone over the specified limit.

You can find more information in the

Docker Compose documentation. Q:

Open file name using dialog or list box I

have an ArrayList from which i want to

---

get the file name. But i want to get the filename in a dialog like this : Open a file

A: Maybe you are looking for something like this: private void

```
button1_Click(object sender, EventArgs e) { FolderBrowserDialog fbd = new FolderBrowserDialog(); fbd.Filter = "Files (*.ext)"; if (fbd.ShowDialog() == DialogResult.OK) { var result = fbd.SelectedPath; textBox1.Text = result; } } If you want
```
