▲▼▲▼ "[The] visual appearance of the world is absolutely gorgeous. [...] The huge and expansive views and the unique elements that come with them make this feel like a brand new RPG, despite the fact that it's an action RPG." GameXPlore "[The] [...] tension and support that you get from leveling up and collecting new gear are what really makes this game stand out, as this is the one game that straddles the line between action, RPG, and action-RPG. [...] [It] has great pacing, strategic choices, and a vast world that just keeps on giving." Game Goblin "If you like action RPGs, if you like rogue-likes, if you like turn-based RPGs, if you like turn-based action-RPGs — if you like JRPGs, if you like Dungeons and Dragons-themed RPGs, if you like exploring and fighting your way through dungeon-crawling locations then you should try Tarnished — it will appeal to you because it's so well-designed, so well-balanced, so well-crafted and beautifully-rendered that it overpowers and overcomes most flaws and shortcomings that might have existed in the original." Game Nameless "A fun looking action rpg, but that really has its roots in traditional rpgs. It's a mixed bag

of rogue-like and RPG. [...] An improvement on its predecessor [Elden Ring], but still has its issues." [Terms of Sale]™
Version 1.3.0 - 2016/09/28

? Rise From Suspended Class To Hero!
? New Post Order System And the Order Allocation System!

What is OrderAllocation?...

OrderAllocation is a system for allocating the order of your battles. The number of his or her class is regarded as a kind of military property, and as a character gains experience points, it will increase until it reaches level 40. By ranking your characters at various levels and specifically ordering their classes, you can have a fair amount of control over the course of your battles.

When and how to play the OrderAllocation....

When you "Hire Order Allocation", you can become invulnerable to defeat, at the cost of invincibility points. However, the number of the points you used to buy order can't be taken back.

When this character is defeated, the points were obtained during this time remain. Then, you can obtain the points of that character again during the battle of the next day. If you continue to do so, the points you acquired gradually become bigger and bigger. By increasing the number of points that you use, you can shorten the period of invulnerability with the chance of large battles.

If you buy the order for certain characters continuously for some time, you can prevent them from falling to a tough boss when they get close to a boss. And, you can also receive a bonus when facing a boss.
